1 RESEARCH TITLE

AN ANDROID PHONE APP FOR REDUCING PAPER WORK BY KEEP-
ING TRACK OF PATIENT HISTORY IN ANDROID PHONES
FOR NEW LIFE HOSPITAL, MBALE

2 abstract

Smart phones are now ubiquitous. The most popular operating system these days is Android. Its easy to use and affordable to all classes.

We can find a lot of applications coming up for android based phones. Games, Security, etc App are available for these phones these days.

PATIENT HISTORY TRACKER is an android application. This application will store all the emergency call numbers like Hospital, personal doctors number etc. Patient does not need to carry the files of previously held check up. This application provides a log-in for doctor and patient as well. Doctor can access the medical diagnose information of the patient.

Patient is registered with a unique ID. So the database of history of a patient is available with all the doctors registered with the application.

Patient can view their medical diagnose by logging onto their accounts. When travelling or getting treatment from a new doctor then doctor can easily get the patients medical history through this application.

Patient can save appointments with Doctors and medicine reminders. As per pre-diagnosed diseases, a list of Dos and Donts will be attached to the patients profile.

These will ease the tedious work of handling all the papers and files of hospitals.

It will analyze for common disease being found in most patient and number of people affected. It will provide Medical reports that will be digitized and it will be easy to be handled by one.

3 introduction

4 background

4.0.1 Project Idea:

"Patient history tracker system" is being developed to assist a patient and doctor can register, view the medical record anywhere, anytime .Also reduce the overhead of handling files every time.

The main idea of this application is doctor can find the number of people affected by particular disease, anyone can view health tip, Medical record is available all time.

This is an innovative application for patient and doctor acceptance that will provide comfort, convenience and efficiency in everyday life.

5 Motivation:

Bringing down health care costs but also facilitate automating patient identification processes in hospitals and use of PDAs, Smart phones, for design of health care management system .
